About Me

I'm a creative Web Developer and UX/UI Designer with a strong focus on front-end and user experience. I started with WordPress and Elementor, later expanding into Webflow for more flexible design. I've completed the Google UX Design specialization and am now sharpening my front-end skills through Meta's program, learning React.js, HTML, CSS, and Bootstrap.

● UX/UI Design Skills

User-centered design   Wireframing

prototyping   Usability research

Accessibility best practices

Visual design principles

● Education

Intermediate In Computer Science   2020-2022

FG Collage Mangla Cantt

Bachelors In Software Engineering   2022-2026

Virtual University Of Pakistan

● Web Development Skills

HTML5   CSS3   Bootstrap

JavaScript   Responsive design

Currently learning React.js

● Work Experiance

Freelance Work   2024-Present

As a freelance web developer since 2024, I've designed and built responsive websites using WordPress, focusing on user experience, eCommerce functionality, and clean visual design. My work integrates UX principles, from intuitive navigation to accessibility considerations. Currently, I'm transitioning toward modern front-end development using HTML, CSS, and React to create more scalable and interactive web solutions.
